

## Specifications:

- Input voltage: **230 V AC**
- Power Frequency: **50 Hz**
- IP Rating: **IP44**
- Power Consumption: **0.9W (work), 0.9W (static)**
- Rated Load: **1200W (incandescent lamp), 300W (LED & energy-saving lamp)**
- Installation Height: **1.8 m - 2.5 m**
- Ambient Light: **3-2000LUX (adjustable)**
- Time-Delay: **10sec - 7min**
- Detector angle: **180°**
- Detection Distance: **0 - 12 m max (24°C)**
- Detection Motion Speed: **0.6-1.5m/s**
- Working Humidity: **max. 93%RH**
- Working Temperature: **-20 +40°C**
- Weight: **89 g**

## English - Description (fig. A)

- Infrared sensor • The infrared sensor detects motion.
- Time button • Turn the button to set the time.
- Illuminance button • Turn the button to set the illuminance (lux).
- PIR sensitivity button • Turn the button to set the PIR sensitivity.

**Installation and connection (fig. B & C)**  
 • Do not install the detector near heat sources (e.g. heating vents, air conditioning units, lamps).  
 • Do not point the detector towards objects with highly reflective surfaces (e.g. mirrors).  
 • Do not point the detector towards objects that may fall onto the wall (e.g. curtains, tall plants).  
 • Before installing, make sure that the power supply is disconnected.  
 • Clean the detector glass before detector at least 1.8 meter from the floor.  
 • Open the power terminal.  
 • Install the bottom lid with the screw on the required position.  
 • Connect the power wire and the load wire into the connection-wire column. Refer to the connection diagram for the correct wiring.  
 • Install the sensor to the bottom lid and tighten the screw.

## Testing the device

- Turn the illuminance button clockwise to the maximum position. Turn the time button counterclockwise to the minimum position.
- Connect the power supply. The infrared sensor will heat up. After 30 seconds, the device goes to operation mode.
- Turn the illuminance button counterclockwise to the minimum position. If you test the device below 3 lux, the device should not react. Turn the infrared sensor on opaque objects (e.g. towels), the device should work. If there are no motion signals, the device should stop working within 7-13 seconds.

Note: If you test the device in daylight, turn the illuminance button clockwise to the maximum position to make sure that the infrared sensor can detect motion.

## Technical data

Installation height	1.8-2.5 m
Detection range	180°
Detection distance	max. 12 m (< 24 °C)
Ambient light	3-2000 lux (adjustable)
Time delay	min. 10 sec. :3 sec. / max. 7 min. :2 min.
Rated load	1200 W (incandescent lamp) 300 W (energy-saving lamp)
Power consumption	0.9 W (working) / 0.9 W (static)
Operating temperature	-20 ~ +40 °C
Relative humidity	< 93%

## Safety

## General safety

- Read the manual carefully before use. Keep the manual for future reference.
- The manufacturer is not liable for consequential damages or for damages to property or persons caused by nonobservance of the safety instructions and improper use of the device.
- The device must not be installed in areas where children under 8 years of age can reach it. Physical, sensorial or mental lack of experience and knowledge if they are supervised or instructed to handle the device in a safe way and understand the hazards involved. Cleaning and user maintenance shall not be made by children unless they are older than 8 years and supervised. Keep the device and its mains cable out of the reach of children younger than 8 years. Children shall not play with the device.
- Only the device designer can repair the device. Do not use the device for other purposes than described in the manual.
- Do not use the device if it is damaged or defective. If the device is damaged or defective, replace the device immediately.
- The device is suitable for outdoor use only. Do not use the device in commercial purposes.
- The device is suitable for bathtubs, showers, basins or other vessels containing water.
- Do not use a timer or a separate remote-control system that switches on the device automatically.
- Do not cover the device.

## Electrical safety

- CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN**
- To reduce risk of electric shock, this product should only be opened by an authorized technician when service is required.
  - Disconnect the product from the mains and other equipment if a problem should occur.
  - Do not use the device if the mains cable or the device is damaged or defective. If the mains cable or mains plug is damaged or defective, it must be replaced by the manufacturer or an authorized repair agent.
  - Before use, always check that the main's voltage is the same as the voltage on the rating plate of the device.
  - Do not move the device by pulling the mains cable. Make sure that the mains cable cannot become entangled.
  - Do not immerse the device, the mains cable or the mains plug in water or other liquids.
  - Do not leave the device unattended while the mains plug is connected to the mains supply.
  - Do not use an extension cable.

## Cleaning and maintenance

- Warning!**
- Before cleaning or maintenance, switch off the device, remove the mains plug from the wall socket and wait until the device has cooled down.
  - Do not use cleaning solvents or abrasives.
  - Do not clean the inside of the device.
  - Do not attempt to repair the device. If the device does not operate correctly, replace it.
  - Clean the device using a soft, damp cloth. Thoroughly dry the device with a clean, dry cloth.

## Support

If you need further help or have comments or suggestions please visit [www.nedis.com/support](http://www.nedis.com/support)

## Contact

NEDIS B.V., De Tweeling 28, 5215 MC's-Hertogenbosch, The Netherlands

## Nederlands - Beschrijving (fig. A)

- Infraroodsensor • De infraroodsensor detecteert beweging.
- Tijdknop • Draai de knop om de tijd in te stellen.
- Lichtsterktenknop • Draai de knop om de lichtsterkte (lux) in te stellen.
- PIR gevoeligheidsknop • Draai de knop om de PIR-gevoeligheid in te stellen.

## Installeer en aansluiting (fig. B &amp; C)

- Installeer de detector niet in de buurt van automaten (bijv. verwarmingsopeningen, airconditioners, lampen). Richt de detector niet voor spiegels met reflecterende oppervlakken (bijv. spiegels).
- Richt de detector niet voor spiegels die in de wind kunnen bewegen (bijv. gordijnen, hoge planten).
- Controleer voor de installatie of de voeding is losgekoppeld.
- Kies een geschikte locatie. Installeer de detector minstens 1,8 meter van de vloer.
- Vervang de schroef van het onderste deksel.
- Open de achterkant van de detector.
- Installeer het onderste deksel met de schroef op de gewenste positie.
- Sluit de stroomdraad en de laaddraad op de aansluiting van de lamp aan met behulp van stadsbrandstof. Raadpleeg het aansluitschema voor de juiste bedrading.
- Installeer de sensor op het onderste deksel en draai de schroef vast.

## Het apparaat testen

- Draai de lichtsterktenknop rechtsom naar de maximale positie. Draai de tijdknop linksom naar de minimale positie.
- Sluit de lamp aan en draai de tijdknop rechtsom naar de maximale positie.
- Draai de lichtsterktenknop minimaal naar de minimale positie. Als u het apparaat onder 3 lux ziet, zou het apparaat niet meer moeten werken. Als u de bewegingsignalen ziet, dan is het apparaat niet meer in staat de bewegingen te detecteren.

## Let op!

Als u het apparaat bij daglicht test, draai de lichtsterktenknop rechtsom naar de maximale positie om ervoor te zorgen dat de infraroodsensor beweging detecteert.

## Technische gegevens

Installatiehoogte	1.8-2.5 m
Detectiebereik	180°
Detectiestand	max. 12 m (< 24 °C)
Detectiebewegingssnelheid	0.6-1.5 m/s
Ongewijzigd	3-2000 lux (instellbaar)
Vertraging	min. 10 sec. :3 sec. / max. 7 min. :2 min.
Nominale belasting	1200 W (glühlampe) 300 W (sparendlamp)
Energieverbruik	0.9 W (werkend) / 0.9 W (statisch)
Bedrijfstemperatuur	-20 ~ +40 °C
Relatieve vochtigheid	< 93%

## Veiligheid

## Algemene veiligheid

Uitschakelen voor het gebruik. Beware de handleiding voor latere raadpleging.

- De fabrikant is niet aansprakelijk voor gevolgschade of voor schade aan eigendommen of personen veroorzaakt door het niet naleven van deze richtlijnen.
- Het apparaat kan de netvoeding beschadigen of defect zijn. Houd de netvoeding of de netstekker beschadigd of defect. Is dat de netstekker beschadigd of defect, moet u de netstekker van de fabrikant of een autoriseerde Service-Partner erneuert worden.

Gevreesd dat de sensor wordt verstoord door de netvoeding.

Verwijder de sensor van de netvoeding.
