

SPBB100BK | SPBB100WT

Firmware update Pre-set Stations

1. Download the zip-file from the webshop
 - ✓ SOFTWARE_SPBB100BK_20190801.zip or
 - SOFTWARE_SPBB100WT_20190801.zip
2. Unzip the file and copy the files to an empty USB drive
 - ✓ boot.ali
 - ✓ nemo.bin
3. Turn on the device and select source "USB".
4. Connect the USB drive to the USB port on the front side.
You will hear a sound and the display will change to "UP" (uploading).
5. After +/- 30 – 40 seconds, the upload is successful and you will hear an alarm.
6. Turn off the device by removing the power adapter and wait for 10 seconds.
7. Reconnect the power adapter and turn on the device.
8. Auto-search for the FM radio stations, all stations that are found will be stored into the memory (max. 20 stations).
9. When you turn off the device, the pre-set station will be memorized and can be played easily.
